

1. Die-cut out of desired material, and apply a strip of adhesive to the back of the slider piece along the tab. Fold the center crease of the slider window outward.

2. Fold the tab of the slider toward the front.

3. Attach the slider to the bottom edge of the sliding window on the card front. Apply adhesive to the bottom and side edges of the card front.

4. Fold down the slider, and adhere the back of the card to the card front.

5. Pulling on the slider will cause the sliding window to open and reveal two areas that may be used for sentiments: the slider itself and the area behind the sliding door.
