

662803 Sizzix® Thinlits™ Die Set - Bag, Favor w/Scallop Top by Lori Whitlock

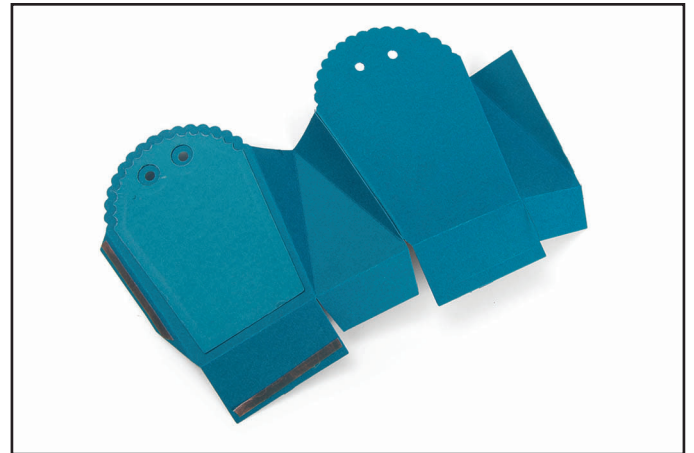

1. Die-cut out of desired material, and apply adhesive as shown. Supplies also include a length of string or ribbon, two small brads and a pointed tool such as a Die Pick.

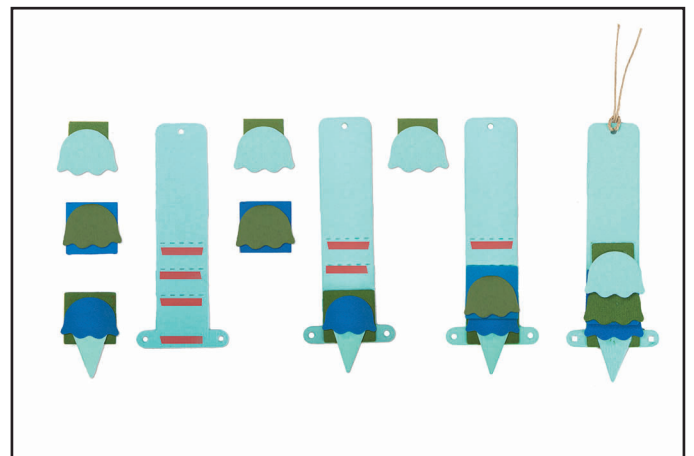

3. Adhere the remaining side tab to the corresponding edge of the other side. Fold in the short bottom tabs. Adhere the long bottom tabs in place.

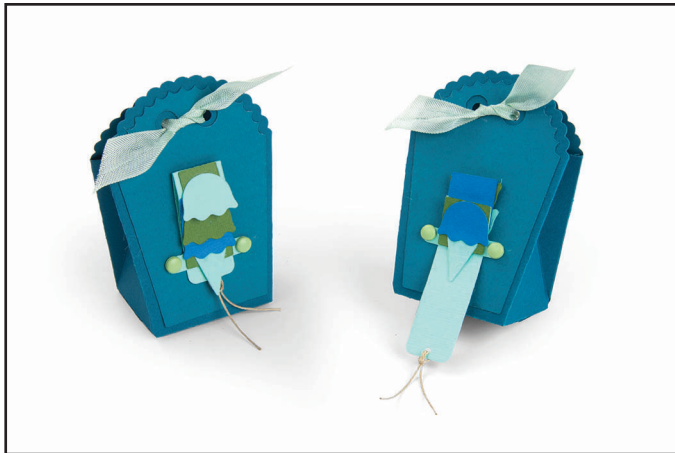

5. Place the pull tab in the desired location on the front of the bag, and use a Die Pick to pierce the bag through each of the brad holes.

2. Fold on all the crease lines. Adhere the two bag pieces together. Add a decorative panel to one or both sides at this time.

4. Build the mechanism by first attaching a complete ice-cream cone to the bottom square and an ice-cream scoop to the middle and top squares. Apply adhesive to each of the corresponding three sections of the pull tab. Align the bottom of the bottom square with the bottom of the pull tab and adhere in place. Adhere the top half of the middle square to the middle section of the pull tab and the top square to the top section. Attach a string or ribbon to the top hole of the pull tab, and then fold the blank section behind the cone section.

6. Attach the pull tab with two small tabs, and embellish as desired.
