

## 663146 Sizzix® Bigz™ Die - Hanging Lantern by Crafty Chica™

1. Die-cut out of desired material, and apply adhesive as shown. You will need two pieces of twine or ribbon approximately 8" in length to tie off the top of the lantern.

2. Adhere the side panel pieces together as shown. If you want to cover the inside of the cutout shapes with patterned paper or vellum, do so at this step. Paper layered on the panels should be attached to the opposite side shown in the image.

3. Adhere the loose tab to the open edge of the adjacent set of panels. Fold the tip with flaps inward and the round tabs up.

4. Thread twine or ribbon through the set of holes that face each other as shown.

5. Gather the ends of the twine or ribbon and tie them off.
