

661880 Sizzix® Thinlits™ Die Set - Lantern by David Tutera™

1. Die-cut four lantern panels from desired material. Hand-cut sheets of vellum or similar translucent material at 3 5/8" x 5 1/4" (9.21cm x 13.34cm) for each panel.

2. Adhere the vellum to the back side of each panel. Be sure to leave an open edge opposite the tab so that there is enough area for adhering the neighboring panel.

3. Adhere all four panels together in a row.

4. Adhere the leading edge of the first panel to the trailing tab of the last panel, and embellish as desired.
